Projects

BizzOps — *ReactJS, NodeJs, MongoDB, Express, Tailwind CSS*

- Developed BizzOps, a comprehensive business management platform designed to streamline and optimize business operations across various domains. The platform offers an all-in-one solution for inventory management, financial statistics, staff management, profit-loss analysis, daily income reporting, and invoice management.

Loopy — *NextJs, TypeScript, PostgreSQL, Prisma, Tailwind CSS, Shadcn*

- Loopy is a dynamic platform that empowers developers to store, share, and collaborate on code snippets. It combines elements of a code repository and a Q&A community, allowing users to upload, categorize, and discover reusable code for various use cases. Integrated with VS Code, Loopy makes it easy to upload snippets directly from the editor, streamlining the process. The platform fosters collaboration by providing a constantly evolving library of solutions to real-world coding challenges.

HealthInsights — *Python, TensorFlow, PyTorch, Streamlit, Google-Gemini*

- Developed an advanced diagnostic tool integrating Machine Learning algorithms and natural language processing (NLP) for chronic disease classification and report analysis. Enhanced early detection and improved patient care by automating diagnosis and generating comprehensive, data-driven reports.
